SUMMARY

Applied AI Research Engineer with 6+ years across AI/ML R&D, backed by 3 years of production software engineering. Papers at ACM Multimedia and CVPR workshop, with experience translating applied AI research into tools adopted across 80+ Singapore government agencies.

TECHNICAL SKILLS

Core Development: Python, PyTorch, SQL, Hugging Face, Docker, AWS, RunPod

Research Areas: Synthetic data generation across tabular, sequential, image, and video data; computer vision; multimodal AI; RAG systems; LLM evaluation; benchmark design; data privacy; differential privacy

EXPERIENCE

Government Technology Agency (GovTech), Singapore

Applied AI Research Engineer | April 2022 – Present

- **First-authored** CVPR 2026 workshop paper (accepted, SynData4CV) and ACM MM 2026 Dataset Track submission on privacy-aware synthetic video benchmarking for worker-under-suspended-load detection, using image-text-to-video foundation models and large multimodal models for both data generation and evaluation.
- **Researched and developed** Mirage, a synthetic data generation platform for tabular and sequential datasets — covering diffusion-based modelling, evaluation metrics, data preparation workflows, and user-facing product design.
- **Led** DataSharingAssist, a RAG-based AI prototype for AI-assisted data classification and contextual guidance in sensitive data-sharing workflows; winner of a government-wide GovTech hackathon.
- **Led** the central anonymization and synthetic data toolkit adopted by 80+ Singapore government agencies, translating applied AI and PET research into production-facing tooling.
- Exploring research-agent workflows for applied AI R&D, including literature review, hypothesis generation, experiment planning, and structured evidence synthesis.
- Collaborated with policymakers, engineering teams, and industrial and academic experts (incl. Prof. Mohan Kankanhalli, Prof. Xiaokui Xiao, Dr. Damien Desfontaines) to evaluate emerging AI methods and guide responsible adoption across public-sector use cases.

NUS Centre for Research in Privacy Technologies Singapore

AI Researcher | Jan 2020 – Dec 2021

- Conducted computer vision research on human attribute prediction under privacy-preserving conditions, resulting in an **ACM MM 2021 oral paper**; led dataset curation, PyTorch experimentation, statistical testing, and evaluation.

Earlier

- **Software Engineer, DBS Bank** (Hyderabad, Sep 2017 – Jul 2019) — Migrated a high-priority digital banking workflow to ReactJS; built production features across frontend and backend.
- **Software Engineer, HashedIn Technologies** (Bangalore, Jan 2016 – Jan 2017) — Built SaaS product features in an Agile engineering team using ReactJS, Django REST Framework, and AWS.

RESEARCH PUBLICATIONS

- **Anshu Singh**, et al. "Privacy-Aware Synthetic Video Benchmarking and Relational Evaluation for Worker-Under-Suspended-Load Detection." 3rd Workshop on Synthetic Data for Computer Vision (SynData4CV), CVPR 2026. **[Accepted]**
- **Anshu Singh**, et al. "SynthSite: Privacy-Aware Synthetic Video Benchmarking for Worker-Under-Suspended-Load Detection." ACM Multimedia 2026 Dataset Track. **[Under review]**

- **Anshu Singh**, Shaojing Fan, Mohan Kankanhalli. "*Human Attributes Prediction under Privacy-Preserving Conditions.*" ACM Multimedia 2021. **[Oral]**
- Authored technical primers on synthetic data generation and differential privacy, reviewed by Prof. Mohan Kankanhalli, Prof. Xiaokui Xiao, Dr. Shlomi Hod, Prof. Anthony Tung, and Dr. Damien Desfontaines.

TALKS, SERVICE & COMMUNITY LEADERSHIP

- **International Chair**, IEEE Symposium on Privacy Expectations (ISoPE 2026).
- **Lead Organizer & Reviewer**, AAAI 2026 Workshop on *Shaping Responsible Synthetic Data in the Era of Foundation Models* (with Prof. Rachel Cummings, Dr. Shlomi Hod, Dr. Zilong Zhao).
- **International talks**: USENIX PEPR 2023, California; Sydney Privacy Workshop 2024, Australia; ISoPE 2025, New York.
- **Paper Club, Lorong AI**: Co-led restart of Singapore's cross-sector AI paper-reading community; presented sessions on vision-language models and research agents, plus two AI Wednesdays talks on synthetic data.
- **Practitioner talks**: GovTech STACK Developer Conference workshops (2022, 2024); STACK Meetups (2023, 2025); invited speaker, Singapore Cybersecurity Consortium.
- **Other**: Reviewer, ISACA whitepaper on Privacy-Enhancing Technologies. Teaching Assistant, CS3219 (Software Engineering Principles & Patterns), NUS (100+ students).

EDUCATION

National University of Singapore (NUS) Aug 2019 – Feb 2021

Master of Computing, Artificial Intelligence specialization — Dissertation in computer vision.

Dhirubhai Ambani Institute of Information & Communication Technology (DAIICT) Jul 2012 – May 2016

B.Tech in Computer Science.
